

ALL GOOD THINGS

Wake up I've been watching you sleep,
Straight up you still do it for me.
My heart feels like it's ready to break,
But not from sadness no way.

And I am opening my eyes,
For the very first time.

Chorus:

No one, there's no one but you,
Come closer, I swear I won't move,
And I can promise you that in our search we'll find
All good things in time.

Stand up I love your shapes and your scars,
My rock is spinning around your star.
Get up and I'll put the radio on,
And we'll dance until the day is all gone

And I am seeing all the signs
For the very first time.

Repeat Chorus

And I am crying out my eyes,
For the very first time.

Repeat Chorus
